Education

Vellore Institute of Technology

B.Tech. in Computer Science and Engineering
Expected Graduation: 2027

Bhopal, India

CGPA: 9.14/10

Mother's Glory Senior Secondary School

Class XII (CBSE)

Nainital, Uttarakhand

92% — 2023

Mother's Glory Senior Secondary School

Class X (CBSE)

Nainital, Uttarakhand

93.8% — 2021

Technical Skills

Languages: Java, Python, JavaScript, Dart, SQL, HTML, CSS

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Computer Architecture

Frameworks & Web: React, TypeScript, FastAPI, Node.js, REST APIs, Flutter, Firebase

Tools & Platforms: AWS, Git, GitHub, VS Code, IntelliJ IDEA, Android Studio, Netlify, Render

Experience

Technology Program Virtual Intern – Deloitte

Jul 2025

Job Simulation

- Completed a technology consulting and software engineering job simulation covering software development, debugging, and technical problem-solving.
- Worked through practical tasks involving structured problem-solving and client-focused technical solutions.

Projects

Phishy-Check 🌀 *Chrome Extension — JavaScript, Node.js, VirusTotal API, Google Safe Browsing API*

- Developed a Chrome extension for detecting potentially malicious and phishing URLs using external threat intelligence APIs.
- Integrated VirusTotal and Google Safe Browsing APIs to analyze URLs and generate safe, suspicious, or malicious verdicts.
- Implemented background URL scanning, browser notifications, and local caching to reduce redundant API requests.
- Developed a Node.js backend for API communication, response processing, and secure API-key management.

BotMed – AI-Assisted Health Screening Tool 🌀 *Hackathon Prototype — React, TypeScript, FastAPI, Python*

- Developed the React/TypeScript frontend for a healthcare screening prototype during a 2025 hackathon.
- Designed and implemented the application UI and user interaction flow for the screening interface.
- Integrated the frontend with the Python/FastAPI backend through REST API endpoints, handling request and response flows.
- Connected user inputs with existing machine-learning and speech-processing services through the backend.

TalentBridge – Skill-Based Job Matching Platform 🌀 *Full-Stack Web Application — React, TypeScript, FastAPI, Python, SQLAlchemy, SQLite*

- Built a full-stack platform connecting candidates with relevant job opportunities based on their skills.
- Developed candidate and employer workflows using React and FastAPI REST APIs for candidate registration and job posting.
- Implemented a rule-based skill matching algorithm using normalized skill sets and set intersection to calculate match percentages.
- Integrated SQLAlchemy with SQLite for persistent storage and deployed the application using Render.

Certifications

- Introduction to Machine Learning – NPTEL
- The Bits and Bytes of Computer Networking – Google
